Superior productivity.
Superior performance.

The OMG advantage

OMG Roofing Products is a leading manufacturer and supplier of commercial roofing products. Our products are designed to improve contractor productivity and enhance roofing system performance.

Regardless of your specific project size or roof deck type, OMG Roofing Products has a product for your application. For additional information, please consult one of our local European distribution partners, visit www.OMGRoofing.com, or call us directly.

Superior productivity. Superior performance.

Look for the Ergonomic Excellence symbol on many OMG products.

superior performance

RhinoBond® is a superior method for attaching insulation and thermoplastic (TPO or PVC) roofing membranes. It offers higher wind ratings with up to 20%–50% fewer fixings and zero penetrations.

The system uses one fixing and plate to secure the insulation and the membrane without penetrating the roof cover. There are no seam fixings and since the fixings are spread across the roof in a grid pattern, the uplift load is more evenly distributed. The result is a system that provides higher wind ratings and virtually eliminates rooftop flutter.

In addition to providing superior wind uplift performance, RhinoBond does not require half sheets so there are fewer rooftop seams. Based on patented electromagnetic welding technology, RhinoBond is easy to use and approved by Factory Mutual and many roofing system manufacturers.

PATENT NOTICE: The OMG RhinoBond® Electromagnetic Induction Tool is covered by U.S. Patent No. 8,492,683.

The RhinoBond welded membrane spreads the wind load evenly across the roof (top) as opposed to the traditional in-seam fixing method (bottom).

Secure the membrane
without penetrating it!

TPO RetroDrain
or **PVC Coated**
Heavy Duty AlumaWeld

RAC Deluxe
RetroDrain

Hercules
RetroDrain

retrofit drains

*Strong, durable OlyFlow® Drains –
so easy to install, you
won't need a subcontractor!*

Hercules® RetroDrain® is North America's most popular retrofit roof drain. It features a one-piece spun aluminum body, heavy duty cast aluminum strainer dome, and clamping ring for extra strength and durability. U-Flow Seal technology provides a watertight mechanical connection to PVC or cast iron pipes. Hercules drains exceed the ANSI/SPRI RD-1 Standard. Available in 76-, 102-, 127- and 152-mm sizes. Also available with heat-weldable TPO coating (**TPO RetroDrain**) or PVC coating (**Heavy Duty AlumaWeld**) for direct membrane attachment.

The **RAC Deluxe RetroDrain** is constructed of aluminum and stainless steel for durability, and features the RAC surface-activated mechanical compression seal to prevent damage from water back-up. Compatible with PVC and cast iron leader pipes, the RAC Deluxe features an extra large flange for membrane attachment, a recessed metal clamping ring and oversized strainer to minimize damming. RAC Deluxe drains exceed the ANSI/SPRI RD-1 standard and are available in 76-, 102-, 127- and 152-mm sizes.

The universal **QuadFlash** provides a fast and efficient method for sealing single, or clusters of, rooftop pipe penetrations. QuadFlash can handle up to four pipes ranging in size from 9.5- to 51-mm in diameter, and will not crack as pipes expand and contract. QuadFlash is maintenance-free and available with black and white EPDM caps.

QuadFlash

Both Hercules and RAC style retrodrains are also available with other PVC and TPO coated flange for direct membrane attachment.

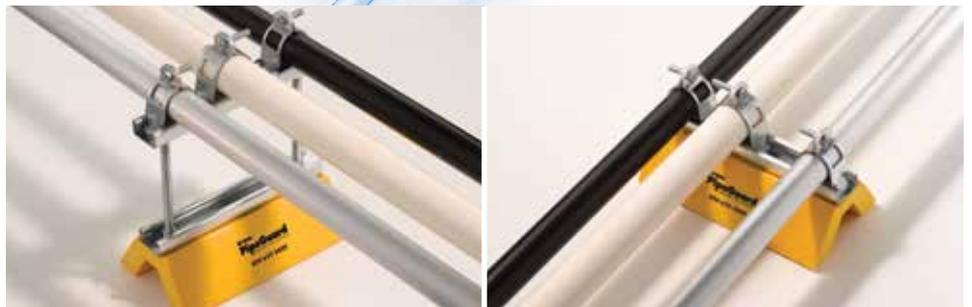

As with all building materials it is the responsibility of the installer to review its usage with a design professional to confirm safety, compatibility and acceptance with the roof cover manufacturer as well as local building codes.

pipe supports

*Nothing is easier, as effective,
economical or versatile.*

OMG PipeGuard™ is the roofing industry's preferred method for supporting small rooftop pipes and is a better alternative to wood blocks.

- Supports steel and PVC pipe, conduit and copper tubing
- Ideal for electrical, solar, gas, HVAC, etc.
- Designed to prevent damage to roof membranes
- Triangle shape sheds water
- Will not deteriorate from water or sunlight exposure
- Wide platform base provides stability and balance
- Nine models to choose from for pipes up to 152-mm in diameter and heights up to 254-mm
- Strut Model and Height Adjustable Strut supports multiple pipes*

Made from 100% recycled material, Safety Yellow models clearly identify trip hazards and are compatible with PVC. Available in Height Adjustable Strut (left) and Strut Models (right).

Ask about our custom capabilities!

**Uses standard strut clamps, sold separately.*

Left to right: Strut Model, Height Adjustable, Small, Large, Mini, Height Adjustable Strut, and Tall Small PipeGuard.

productivity

AccuTrac®, **AccuSeam®** and **RhinoTrac** are automated attachment systems providing the lowest installed cost for mechanical insulation and membrane attachment. In one step, the tool positions the plate as the roof mechanic drives the fixing, doing the job of two, reducing labor and increasing productivity. In addition, these easy-to-use tools are ergonomically designed to minimize bending and reduce worker fatigue.

AccuTrac

AccuSeam

AccuTrac for Insulation Attachment

RhinoTrac for RhinoBond Plate Installation

AccuSeam for Membrane Attachment

By leading the commercial roofing industry in emerging technologies that promote ergonomics, efficiency and excellence, OMG is helping roofers to work faster, safer and with better results.

adhesives

*OlyBond – The most trusted name
in adhesive insulation attachment*

OlyBond® Insulation Adhesives are easy to use, hassle-free and designed to get you off the roof and onto the next job quickly. OlyBond adhesives are approved for use on most roof decks and with all common insulation types.

OlyBond500® is the premiere insulation adhesive for low-slope roofing applications. The fast-acting, dual-component, low-rise polyurethane foam adhesive is odor and noise-free, and offers the lowest installed cost method of insulation attachment. Factory Mutual and Underwriters Laboratories approved.

OlyBond500 Green is the perfect insulation adhesive for sustainable projects. A low VOC, plant-based formula, OlyBond500 Green packs the same performance punch as the original OlyBond500. Factory Mutual and Underwriters Laboratories approved.

Rest easy with **NightShot®** temporary watertight tie-in. OlyBond NightShot forms a temporary seal between new single-ply roof covers and existing asphalt roof covers. NightShot comes in 1,500-ml cartridge sets and is compatible with new EPDM, TPO and PVC materials.

PATENT NOTICE: The OMG PaceCart® dispensing cart and the Bag-in-Box OlyBond500® Part 1/Part 2 adhesive system, including the adhesive dispensing method, are covered by one or more of U.S. Patent Nos. 6,220,526; 8,113,385; 8,132,693; 8,167,170 and 8,474,658.

application tools

OMG offers several easy-to-use tools for applying OlyBond500 Insulation Adhesives:

PaceCart 2® is the exclusive patented applicator for dispensing OlyBond500. Capable of dispensing enough OlyBond500 to apply 557 m² of insulation per hour, this tool is the fastest, lowest-cost system available. The patented PaceCart 2 features a clean, air-tight delivery system for patented Bag-in-Box technology.

The **Cordless Power Applicator** provides constant pressure for even, uninterrupted, adhesive flow and maximum efficiency. The Power Applicator significantly increases production when compared to hand applicators, and comes with two batteries and a charger.

fasteners

OMG Roofing Products has the industry's widest assortment of specialty roof fixings and plates for virtually every roofing application.

Standard RoofGrip® Drill Point Fastener

41–203 mm lengths
#3 Phillips

S W deck types **CE**

Heavy Duty Roofing Fastener

32–609 mm lengths
#3 Phillips head

S W SC deck types **CE**

Extra Heavy Duty Fastener

51–400 mm lengths
#3 Phillips head

S W AL deck types **CE**

RetroDriller Fastener

102–254 mm lengths
#3 square drive

P deck type **CE**

HeadLok®

73–450 mm lengths
Oversized head; SpiderDrive

S W SC deck types

CD-10

51–305 mm lengths
Flat top pan head
Diamond guide point

SC deck type **CE**

Polymer GypTec™

64–305 mm lengths
6.3 mm square drive

G CWI deck types

Lip Bar

19 mm wide, 4.7 mm lip, 2 mm thick
Punched 152, 203 or 304 mm o.c.
Terminates single-ply membrane at parapet walls

hassle-free repairs

Professional grade tape for fast, watertight roof repairs

Whenever you have a roof leak or repair to deal with, **OMG EverSeal®** brand of roof repair tape is the ideal choice. It's fast, watertight and designed for use on most roof surfaces. EverSeal features OMG's exclusive Advanced Synthetic Adhesive Polymer (ASAP) technology that bonds to most common roofing surfaces including: EPDM, TPO, aged PVC, HYPALON®/CSPE, modified bitumen, smooth BUR, metal and more!

- OMG's exclusive **Ready-to-Roll™** dispenser box packaging makes installation easy and hassle-free. It's convenient for product handling and storage, too.
- EverSeal is **available in 102 mm, 152 mm and 320 mm x 15.24 meter lengths** and comes in both black and white.
- **Synthetic polymer adhesive** – non-asphaltic formulation for maximum compatibility.
- **No primers needed** – faster installation without waiting for primers to flash.
- **Hassle-free EZ-Release Liner™** – No frustration when peeling the liner from the adhesive.
- **Chemical & UV resistant** – For superb long-term performance.
- **Wide installation temperature range** – Can be used year-round.
- **Available individually or in master boxes** – For easy handling and storage.

EverSeal will adhere to most construction materials and can also be used to repair gutters and edge metal, as well as flash skylights and penetrations.

**Fix
Roof Leaks
Fast!**
