## KS1000 RW - Method 1: Using trestles

Step 1:

On Panels stacked crown-down apply the Rota Boy using a crane and lift it.

Step 2:

Rotate Panel 180°

Step 3:

Lay the now inverted panel with the crown face up on trestles, positioned next to the bundle. The number of trestles will vary dependant on length – max 3mt centres.

Step 4:

Rotate the Rota Boy back 180° and use it to lift the panel to the roof.

**Note:-**

All customers using this machine will required site training and following successful training certificates will be issued. All customers must carry out the necessary 'risk assessments' and prepare the 'method statements' to suit each particular project when using this machine
