

JUAL

## VENTILATION COWL – PLASTIGEN

### PRODUCT DESCRIPTION

#### *JUAL Ventilation Cowl - Plastigen*

**APPLICATIONS:**

The JUAL Plastigen ventilation cowl is a secure watertight solution for terminating ventilation outlets which penetrate the roofing membrane. The cowl is designed for installation on roofs with weldable bituminous (ABS version) and synthetic foil (PVC version) membranes.

Can be supplied with 15 mm mineral wool to prevent condensation

JUAL recommends to use the Protection cap (article no. 50030).

**MATERIALER:**

ABS plastic (for bitumen membrane)

PVC plastic (for foil membrane)

Installation and application must be conducted in accordance with current industry standards and compatibility with the roof's membrane must be secured.
