

JUAL

VENTILATION COWL (FLAT ROOFS)

PRODUCT DESCRIPTION

JUAL Ventilation Cowl (flat roofs)

APPLICATIONS:

The JUAL ventilation cowl is a secure watertight solution for terminating ventilation outlets which penetrate the roofing membrane. The cowl is designed for installation on roofs with weld-able bituminous membranes. Can be supplied with 15 mm mineral wool to prevent condensation.

MATERIALS:

- Zink no. 14 (thickness 0,8 mm)
- Black powder coated aluminium (thickness 1,25 mm)
- Stainless steel, AISI 304 (thickness 0,5 mm)

Installation and application must be conducted in accordance with current industry standards and compatibility with the roof's membrane must be secured.
