Automated Insulation Attachment System

Productivity

- One laborer can do the job of two. In one step, the insulation plate is placed in position by the AccuTrac tool as the laborer drives the fastener.
- Installation time is greatly reduced. Projects will move along at a significant pace.
- Lightweight and easily maneuverable – accommodating both straight and "zig zag" fastening patterns.
- Works with all types of insulation including hard boards.
- Uses both Phillips and hex head fasteners.
- For use with #12 standard fasteners, #14 heavy duty fasteners and #15 fasteners.*

Quality Installation

- Overdriving and underdriving is eliminated.
- Consistent vertical alignment of fasteners ensures maximum thread engagement and pullout performance.

Minimizes Operator Fatigue

- The constant, bending-over fastening method is eliminated.
- Simple to learn, operate and maintain.

Proven Field Performance

- Used by top rated roofing contractors, nationwide.
- Accepted and approved by major roofing manufacturers for use on fully warranted systems.

153 Bowles Road, Agawam, MA 01001
800-633-3800 • www.olyfast.com

Providing the lowest installed cost for mechanical insulation attachment.

Sold and serviced by OMG.

**Use only OMG manufactured and approved AccuTrac fasteners and plates. Attempting to use anything else will not work and will damage the tool.*
